Data, interpretation, and recommendations by True North will be based solely on information available to True North. True North is responsible for those data, interpretations, and recommendations, but will not be responsible for other parties' interpretations or use of the information developed. Client acknowledges that whenever a Project involves hazardous or toxic materials and/or investigations of chemicals in the environment, there are inherent uncertainties involved (such as limitations on laboratory analytical methods, variations in subsurface conditions and the like) that may adversely affect the results of the Project, even though the services are performed with skill and care. True North shall perform the services consistent with that level of care and skill ordinarily exercised by other professional consultants under similar circumstances at the same time the services are performed. No other warranty, expressed or implied, is made.
